***Reasons for Allowance***

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of identifying a range of causes that are problem specific with associated priority set by quantitative value that resulted from a set of isolating questions conditioned by a user into a three level ranking wherein the related questions are associated with a problem to be diagnosed and such questions were extracted from a knowledge database using correlation levels between causes and questions to a predetermined threshold value to establish question relevancy.

The closest prior art (Hennessey et al, U.S. Patent 6,483,938) teaches system and method for classifying an anomaly using an image of the anomaly and processing the image such that a reference can be made to a knowledge base to extract a label for the anomaly. Hennessey does not teach anomaly classification using non image descriptors nor does Hennessey teach identification of descriptive causes that facilitate user steps in anomaly correction. The applicant's invention is an improvement over Hennessey facilitating removal of the anomaly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
